# SAMANETI ASHWINI

Hyderabad, Telangana | +91-8688807475 | ashwinisamaneti@gmail.com | LinkedIn | Portfolio | GitHub

## PROFESSIONAL SUMMARY

Python Software Engineer (Fresher) and B.Tech graduate in Artificial Intelligence with hands-on experience developing, testing and debugging Python applications using Django, FastAPI, Flask and SQL. Built three projects involving REST APIs, PostgreSQL, JWT authentication and Docker, with a focus on clean, well-documented code. Strong analytical and communication skills, eager to collaborate with senior engineers and cross-functional teams to deliver high-quality solutions.

## TECHNICAL SKILLS

**Languages:** Python, SQL

**Core Skills:** Python Programming, Software Development, Debugging & Troubleshooting, REST API Development, Clean & Well-Documented Code

**Backend & APIs:** Django, Django REST Framework, FastAPI, Flask, REST APIs, JWT Authentication

**Databases:** PostgreSQL, MySQL, Django ORM

**Frontend:** HTML, CSS, JavaScript

**AI / ML:** Machine Learning, Deep Learning, NLP, LLMs, Prompt Engineering, RAG, OpenCV

**Tools:** Git, GitHub, Docker, Jupyter Notebook, Google Colab, VS Code

**Soft Skills:** Communication, Analytical Thinking, Problem Solving, Teamwork, Adaptability

## PROJECTS

**CodeFoundry – Software Engineering Readiness & Simulation Platform** *Python, Django 5.2, DRF, PostgreSQL, Redis, React, Docker*

- Developed a repository-style practice platform where users solve bug-fixing, feature-development, API, database, security and code-review challenges.
- Implemented the end-to-end workflow: challenge selection, repository workspace, submission, isolated Docker execution, automated test evaluation, scoring and progress tracking.
- Designed backend services for authentication, challenges, submissions, evaluation, skill profiles, achievements, public developer profiles and recruiter dashboards.
- Secured code execution with isolated Docker sandboxes, resource limits, no-network execution, path validation and server-side evaluation.

**SkillTrack – Smart Learning & Career Progress Platform** *Python, Django, DRF, PostgreSQL, Redis, Celery, JWT*

- Built a role-based platform for three user roles (students, mentors, administrators) covering courses, assignments, assessments, projects, skills and job-application tracking.
- Implemented the learning workflow from course enrollment and topic completion to assessments, project submissions, mentor feedback and performance reporting.
- Designed relational database models and backend services with Django ORM and PostgreSQL for users, courses, modules, enrollments, assessments and projects.
- Developed RESTful APIs with JWT authentication, role-based permissions, filtering, searching, pagination and structured responses.

**SMRITI – AI-Powered College Assistant Robot** *Python, OpenCV, Speech Recognition, TTS, ChatGPT API, Raspberry Pi*

- Developed a prototype AI assistant robot in Python on Raspberry Pi to provide department-level assistance in a college environment.
- Implemented face recognition and facial emotion detection with OpenCV to identify users and personalize interactions.
- Integrated the ChatGPT API for context-aware, AI-driven responses to user queries.
- Built speech-based interaction using speech recognition and text-to-speech.

## EDUCATION

**Vidya Jyothi Institute of Technology (VJIT)** – B.Tech in Artificial Intelligence, CGPA: 8.34/10 *2022 – 2026*

**Sri Chaitanya Junior College** – Intermediate (MPC), 73.1% *2020 – 2022*

**Infant Jesus International School** – Secondary Education (10th Grade), GPA: 10/10 *2020*

## CERTIFICATIONS

- AWS Academy Graduate: Machine Learning Foundations – Amazon Web Services (2024)
- PCAP: Programming Essentials in Python – Cisco Networking Academy / OpenEDG (2023)
- Python for Data Science (PY0101EN) – IBM (2023)
- AI Foundation / AI Advanced – Hexart.In (NASSCOM Foundation, Li2 Group, Hexagon) (2024)
- Natural Language Processing – Infosys Springboard (2025)

## TRAINING & ACHIEVEMENTS

- Full Stack Python with AI Training – Student Tribe.
- Smart India Hackathon (SIH): Participated in developing a Real-Time Vehicle Tracking System under the Smart Vehicles theme.
- NIT Warangal: Attended a national program on AI/ML/DL applications and industry-oriented sessions.
